Subject:	RE: Diamond Alkali Superfund Site - Phase 2 Removal Action MEDDs

Hi Brian,

Thanks, I added the Site_v3 to the file so the data can be loaded to the database. Please remember that you don't need to provide the QAQC location, and sample_type = RB, or TB does not require the sys_loc_code in Sample_v3 section.

The data is now loaded to the EPA EQuIS database.

Best Regards,

Cathy Lai

Good Morning Cathy,

Please see attached for the revised MEDD file which includes the Location_V3 information.

This file was checked for errors in EDP.

Thanks

Hi Brian,

I am still waiting for you to provide the Location_v3 data file in order for me to load the Diamond Alkali data successfully.

Please let me know if you have any questions.

Thank You

Best Regards,

Cathy Lai

Hi Brian,

The values in the "sys_loc_code" column are not defined because I need the Location_v3 file for those location codes. You need to run it through EDP to see those values.

You already provide the "sys_loc_code", please open the data using the EDP and check the errors.

Thanks

Best Regards,

Cathy Lai

Hi Cathy,

I just want to confirm that the only thing that you need populated is "sys_loc_code" (Column J) in the Sample_V3 tab. Will this cause any erros in the MEDD, or will I have to run it through EDP again? Please confirm.

Also, is the "sys_loc_code" field a required field in the USEPA Region II Format?

Hi Brian,

Could you send us the location_v3 data for all the "sys_Loc_code" in the Sample_v3 file?

I listed out the sys_loc_code that we need in the location_v3 file :

sys_loc_code
QAQC
PRR2SEDV2(
PRR2SEDV3!
PRR2SEDV0'
PRR2SEDV0!
PRR2SEDV1:

Hi Cathy,

Yes the "combined MEDD' is a combination of all the 32 excel EDD files (SDGs). The original MEDDs I sent were separated by SDG, (i.e., PRR201.EPAR2_MEDD, PRR202.EPAR2_MEDD etc.). I thought it would make sense to combine all 32 into one file for easier use.

Thanks

Hi Brian,

I received the MEDDs.zip that contains about 32 excel files of EDD data, named as "PRR201.EPAR2_MEDD.xlsx", "PRR201P.EPAR2_MEDD.xlsx", "PRR202.EPAR2_MEDD.xlsx"… etc. So what is this "combined MEDD" file that you sent? Is it the combination of all 32 excel EDD files?

Thanks

Best Regards,

Cathy Lai

Hi

I am not sure what a "piz" file is, so I am going to send two separate emails. The first contains the combined MEDD. The second will have the EDP error summary associated with these MEDDs

Hi Brian,

Could you re-send the "zip" file by changing the "zip" to "piz"?

I cannot receive the "zip" file.

Thanks

Hi Cathy,

Elizabeth forwarded me your email about the Phase II Removal Action MEDDs. I wanted to point out that the MEDDs which were submitted were already checked using EDP prior to submittal to EPA. Please see the attached zip file which includes the EDP error summary indicating such, and as well as a new MEDD file. I combined all of the individual SDGs into a single file.

Please let me know if this meets your needs.

Thanks

Hi Brian.

Please see the below follow-up questions on the Phase 2 MEDDs. Seems there is a bit more info needed. Any questions please let me know.

Thanks!

Elizbeth

Hi Elizabeth,

It is required to have Arcadis to check the EDDs using the EDP before submit them to us. The sys_loc_code in all of the EDDs Sample_v3 are not in our database yet, so we need to have the location_v3 data for all of the locations before I can load these data into the database.

I've attached the location codes we have in the database so you can check the location codes.

Could you send this email to Arcadis so they can correct the errors and re-submit the data to us?

Let me know of any questions.

Thank You.

Best Regards,

Cathy Lai
